Carrier Ultra High Efficiency Single Zone Ductless Heat Pump System

Description of work to be performed

- ✓ **Supply and install new Carrier indoor air handler installed on an exterior wall.**
- ✓ **Supply and install new Carrier variable speed outdoor heat pump, with “Inverter Technology”, installed on the outside of your home on a new composite pad.**
- ✓ **Supply and install new outdoor risers to raise the outdoor heat pump above the composite pad.**
- ✓ **Supply and install condensate drain system.**
- ✓ **Supply and install control wires between outdoor heat pump and indoor air handlers.**
- ✓ **Supply and install new copper refrigerant lines (Up to 20’) between air handler and the outdoor heat pump, including system pressure testing, and system purge.**
- ✓ **Supply and install cosmetic covers for the line sets (Up to 10’) and control wires outside**
- ✓ **Provide electrical connections to the new heat pump directly from your homes main service panel and from the new heat pump (outdoor) to the air handler (indoor).**
- ✓ **Provide all needed mechanical permits with the local jurisdiction.**
- ✓ **Provide system startup and customer walk through including instructions on how to operate your new system and programming of your new remote control.**
- ✓ **Provide the first year of Savings Club Membership for the heat pump system (144.00 value), which includes the maintenance at the end of the year.**
